• TECHNICAL SKILLS :-

Frontend Freamework :- Java, Python, C++, JavaScript.
Databases :- MySQL.
Frontend Technologies :- HTML5, CSS3, React.
Tools & Platforms :- Git,GitHub,Visual Studio Code.

• ProjectTitle: Recruitment Process System

Technologies Used: JSP, Java, HTML/CSS,

• Description:

Developed a web-based application to streamline the recruitment process, allowing HR teams to manage job postings, screen candidates, schedule interviews, and track hiring stages efficiently. The system was built using JSP for server-side logic and MySQL for backend data storage. It features modules for candidate registration, resume upload, recruiter management, and interview scheduling, aiming to automate and enhance the end-to-end recruitment workflow.

• Key Contributions:

Designed and implemented user-friendly interfaces for applicants and recruiters.

Built dynamic pages with JSP to handle real-time data interactions.

Developed secure authentication for recruiters and candidates.

Integrated a database system for efficient tracking of applicants and job positions.

- <u>Summary</u>

I am dedicated computer science student with a passion for learning and problem-solving. Throughout my academic journey, I have gained proficiency in programming languages. My curiosity for scenarios, technology drives me to explore new things in the field, and I am eager to continue growing my expertise to contribute to innovative and challenging tasks

- <u>Declaration</u>

I hereby declare that the information given above is true and correct to the   best of my knowledge and belief.
